CRYSTAL PDRN – BIOREVITALIZANT

Polynucleotides are nature's gift to rejuvenation. Derived from sturgeon gonadal tissue, these DNA segments (molecular weight: 250-500 kDa) are meticulously extracted and purified. Known as **"Sodium DNA"**, these fragments play a vital role in **the life of cells**. By activating adenosine A2 receptors on fibroblasts, **they stimulate collagen and matrix production, including hyaluronic acid.** In vitro tests on keratinocytes and fibroblasts confirm the regenerative and photoprotective prowess of Sodium DNA.

THE ULTIMATE REJUVENATION COCKTAIL

- A sterile meso-cocktail for rejuvenation & **dark under-eye brightening**
- Loaded with Sodium DNA, peptides, & vitamins for **collagen & hydration**
- Enhances texture and overall **skin tone**
- Combats hyperpigmentation and **prevents blemishes**
- **Synergistic blend:** polynucleotides, 7 peptides, 18 EGF types, 15 amino acids, 7 minerals, 3 hyaluronic acids, vitamins, and acids

Directions & Treatment Plan

Apply the mesococktail to the face and massage with a mesoroller or try fractional mesotherapy.

Recommended course

3-5 procedures with a 2 week gap between each session.

For advanced results, **intra dermal injection is an option.**
Customize treatment based on the patient's unique skin condition.
