PREMIUM TREATMENT FOR YOUR CLINIC

# EXOSOMES

Aesthetic &  
Regenerative

## SKIN REGENERATION WITH REJUSOME EXOSOMES

**Exosomes** play a pivotal role in the field of **regenerative medicine**. These pluripotent cells, sourced from adipose tissue, have the unique ability to differentiate into **mesoderm, ectoderm, and endoderm**. This diverse potential makes them invaluable for **regenerative and wound healing applications**.

## EXOSOMES VS. PRP: AESTHETIC & REGENERATIVE ADVANCEMENT

- Derived from **adipose stem cells**, exosomes transform cell recovery
- **Minimize inflammation** for quicker recovery & improved skin hydration
- **No lengthy preparation or freezing is required**, setting them apart from PRP and PRF treatments

Rejusome Exosomes are equally effective for scalp health & promoting healthy hair growth.

- A sterile preparation with lab-bred **exosomes for skin regeneration**
- Includes lyophilized **exosome powder (20mg)** & an **active solvent (5ml)**
- **Recommended course:** 3-5 procedures with a 2 week interval, tailored to skin condition.

## ENHANCING SKIN TREATMENTS WITH REJUSOME EXOSOMES

- Combined with Skinpen treatments, **they reduce post-treatment inflammation**
- **Boost collagen production** for healthier, more hydrated skin
- Ideal for **post-ablative treatments, sensitive skin, & texture improvement**
- **Perfect for micro-needling facials**, enhancing elastin, collagen, and minimizing downtime
