ULTRA V: “THE DROP OF MIRACLE”

ULTRA V is a unique preparation in liquid form of **Polycaprolactone** with **circular microspheres** that have a smooth surface. These microspheres form an **extensive 3D matrix** in the dermis, allowing **PCL** to provide **long-lasting collagen stimulation** and a **lifting effect**.

WHAT IS ULTRA V?

- A unique liquid form of **PCL with circular microspheres**
- Offers **instant lifting** effect and **stimulates collagen** for firmer skin
- Provides **long-lasting results from 1 to 3 years**, depending on skin condition
- Suitable for various face areas: **forehead, cheeks, chin, and lips**
- Easy to use with **30G needles** or **27G cannulas**

Lip treatments using ULTRA V, patients should **avoid** heat, UV rays, swimming, bathing, and alcohol for the first 24 hours.

A pain-relieving cream or local anesthetic may be used before the procedure based on the doctor's advice.

No other aesthetic procedures should be done for 30 days after ULTRA V.

Mixing ULTRA V with other products isn't recommended.

ADVANTAGES

- **Collagen Boost:** Stimulates collagen production for improved skin texture
- **Instant Lift:** Immediate enhancement in skin appearance
- **Duration:** Outlasts other dermal fillers
- **Versatile:** Can be applied to multiple facial areas
- **Safe:** Biocompatible, biodegradable, and harmless

HOW TO INJECT?

Target the **deep dermis layers** with **0.2 cc dots**. Start at the forehead above the pupil's center, then horizontally **2-3 cm** from the nostril, below the cheekbone, between the lip's end and cheekbone, and finally below the pupil aligned with the nose's mid-section.

Key Ingredients: Liquid PCL (20%) and Non-crosslinked HA (2%)
